

# A HELPING HAN

**Hannah McAuley for SU  
Welfare and Equality Officer**

## WHO AM I?

I'm a final year radiation therapy student who has spent the last two years working as Off-Campus Officer for TCDSU.

I've spent four years working to help and improve the lives of students who attend college off-campus in James' and beyond. I started as a class rep, became Therapies Convenor and then Off-Campus Officer purely to help students in any way I can.

I want to change the way welfare and equality of students is viewed in college. A student's well being affects everything in their college life and more.

Now more than ever, students need someone who will help them on a one-to-one daily basis and someone who will fight for them and their rights. I came to college to help people with my degree and became involved in the SU to help other students.

## FINANCE AND HOUSING

If elected I will continue to put pressure on Trinity and the government to provide affordable, purpose-built student accommodation.

I will continue the work of the current Welfare Officer to reinstate and refine the Placement Bursary.

I will continue to promote the T Fund tirelessly so that all students who come to Trinity can be who they really are.

I will organise workshops with bodies such as CATU and renters union for Freshers in Halls to prep for finding houses.

## INCLUSION AND EQUALITY

Current foodbank conditions must be expanded for student dignity. If elected I will ensure better food-safe conditions for these food banks and work to expand them to each Trinity College location, not just Goldsmith.

Lobby for a systematic review for SUSI system and thresholds.

I will ensure inclusion of Foundation Year students by creating a dedicated position on the Welfare Committee open to current foundation year students.

## MY EXPERIENCE

Off-Campus Officer for 2 years  
Therapies Convenor  
SF Radiation Therapy Class Rep  
S2S Mentor

## WELLBEING

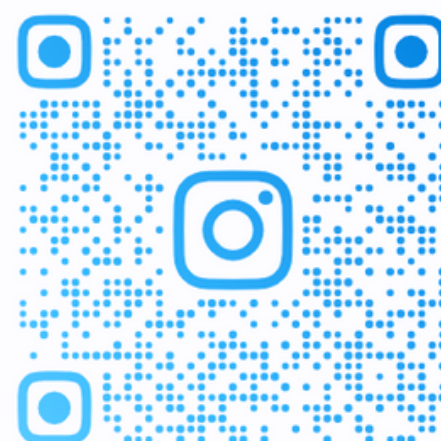

I want to implement suicide awareness training for all PTOs and Sabbatical Officers.

I want to create a subsidised CPR training programme for any and all students to avail of.

I want to continue the work of the current President and work toward ensuring all lectures are recorded where possible.

Placement and internships are daunting for everyone, no matter what course or school you are in. I want to work with Student Counselling Services to establish a form of support groups for these students.
