

I'm **Diogo Ferreira** (he/him), an active PWO member and 2nd-year Environmental Engineering PhD researcher from Portugal. I am a candidate to the role of Postgraduate Representative in the Library & Information Policy Committee. The core responsibilities of the Library and Information Policy Committee include the establishment of strategies and policies that facilitate Library and Information Services in College to students and researchers, as well as communicate with the Board on

noteworthy resource issues related to services provided by the libraries.

Regretfully, the Committee is structured to only accommodate one postgraduate representative from the entire college. In light of this, my main goal is to be the voice of underrepresented Postgraduate Researchers (PGRs) and the link between our issues as PGRs, the PWO, and the Library and Information Services Committee.

The PWO is the only organization founded and run by PGRs, who make up the majority of Trinity's teachers, markers, invigilators, and researchers. Despite this, Trinity does not adequately address our concerns.

By supporting me and the PWO, you are choosing to change the way the college treats its staff and, as a result, improve the education provided to taught students.
